Plant anatomy or phytotomy is the general term for the study of the internal structure of plants. Originally it included plant morphology, the description of the physical form and external structure of plants, but since the mid-20th century plant anatomy has been considered a separate field referring only to internal plant structure. Plant anatomy is now frequently investigated at the cellular ...

The L3 vertebra is in the middle of the five (5) lumbar vertebrae in the lower back portion of the spinal column. Because of the substantial weight-bearing role of the L3, a role it shares with all the lumbar vertebrae, this bone's vertebral arch and cylindrical centrum (vertebral body) are massively built-among the largest of the moveable vertebrae.
