JCiP home page. I was fortunate indeed to have worked with a fantastic team on the design and implementation of the concurrency features added to the Java platform in Java 5.0 and Java 6.

### **Java Concurrency in Practice**

July 2004 (This essay is derived from a talk at Oscon 2004.) A few months ago I finished a new book, and in reviews I keep noticing words like "provocative" and "controversial." To say nothing of "idiotic." I didn't mean to make the book controversial.

### **Great Hackers - Paul Graham**

In computer science, the dining philosophers problem is an example problem often used in concurrent algorithm design to illustrate synchronization issues and techniques for resolving them.. It was originally formulated in 1965 by Edsger Dijkstra as a student exam exercise, presented in terms of computers competing for access to tape drive peripherals. Soon after, Tony Hoare gave the problem ...

A programming language is a formal language, which comprises a set of instructions that produce various kinds of output. Programming languages are used in computer programming to implement algorithms.. Most programming languages consist of instructions for computers. There are programmable machines that use a set of specific instructions, rather than general programming languages.
