Automatic process control in continuous production processes is a combination of control engineering and chemical engineering disciplines that uses industrial control systems to achieve a production level of consistency, economy and safety which could not be achieved purely by human manual control. It is implemented widely in industries such as oil refining, pulp and paper manufacturing ...

Process control - Wikipedia

By Dwight Walker. Chip seals are one of the most commonly used pavement preservation techniques. Sometimes also called seal coats or surface treatments, chip seals are an asphalt binder sprayed on a prepared pavement surface, followed immediately by an application of aggregate (chips).
