In my computer science class, I have completed all my projects; So my teacher thought it'd be a good idea to develop iPhone apps. The only problems is that the class is taught in java, and iPhone apps are written in Objective-C.

How can one develop iPhone apps in Java? - Stack Overflow

R_f values are calculated by looking at the distance each component travels on the chromatography paper compared to the distance traveled by the solvent front. This ratio will be different for each component due to its unique chemical properties. When measuring the distance the component traveled, you should measure from the origin (where the middle of the spot originally was) and then to the ...
