Back to complete list eLearning FAQs Question: What screen resolution should I have my computer set on? How do I change resolution on my computer?

### **What screen resolution should I have my computer set on ...**

640x480 "VGA" resolution is the lowest-common-denominator - by definition all PC's, graphics adapters and monitors must support at least VGA. Because it's the one thing that can be counted on to work, and always work regardless of your hardware selection, it's often used as the fallback when troubleshooting, or the default if your computer doesn't know it can do any better.

### **Why is 640x480 my only resolution option? - Ask Leo**

The display resolution or display modes of a digital television, computer monitor or display device is the number of distinct pixels in each dimension that can be displayed. It can be an ambiguous term especially as the displayed resolution is controlled by different factors in cathode ray tube (CRT) displays, flat-panel displays (including liquid-crystal displays) and projection displays ...

### **Why Can't I See My Computer on the Network?**

Resolution is the noun form of the verb resolve, which comes from Latin *resolvere*, "to loosen, undo, settle." We can still see this meaning in resolution, in the sense of "an explanation" or "a solution"; when a problem, conflict or mystery reaches its resolution, it has been "undone," so to speak. Another common meaning is "determination, resolve": "Jose approached the task with resolution."
